[5589] **R03-10-003 - Order Instituting Rulemaking to implement AB 117 concerning community choice aggregation.**
R04-03-017 - Related matters. This decision denies the motion of Michael Kyes, filed September 7, 2005. The motion asks the Commission to permit the purchase and sale of power by private aggregators based on Kyes' interpretation of Public Utilities Code Section 366(b). This decision finds the Commission is barred from permitting private aggregation by Water Code Section 80110. These proceedings are closed.

[5721] **A05-08-034 - Suburban Water Systems (Suburban).**
This decision grants Suburban interim rate relief on July 1, 2006, based on the rate of inflation as compared with existing rates. Interim rate relief is in the public interest, because the delay in processing Suburban's general rate case is not Suburban's fault. Suburban has made a substantial showing supporting a rate increase at least equal to the rate of inflation in its filings in this proceeding.

[5738] **C04-10-024 - Pac-West Telecomm, Inc. vs. AT&T Communications of California, Inc., Teleport Communications Group of San Francisco, Teleport Communications Group of Los Angeles, Teleport Communications Group of San Diego.**
- This decision, like the Presiding Officer's Decision, grants the complaint filed by Pac-West Telecomm, Inc. against AT&T Communications of California, Inc. Pac-West alleges that AT&T is obliged to pay the termination charges in Pac-West's intrastate tariff for traffic that originates on AT&T's network and is terminated on Pac-West's network. AT&T argues that it is not obliged to pay such charges, because virtually all of the AT&T traffic that Pac-West terminates is "ISP-bound" within the meaning of the FCC's "ISP Remand Order" (16 FCC Rcd 9151), and that under ¶ 81 of that order, such traffic must be exchanged on a "bill-and-keep" basis. This decision concludes, however, that AT&T cannot rely on ¶ 81 of the ISP Remand Order, because AT&T has not made the "mirroring offer" required by ¶ 89 of the ISP Remand Order. Since AT&T does not dispute that if the termination charges are computed according to the Pac-West tariff applicable here, the amount due would be \$7,115,014.16, the decision directs AT&T to pay Pac-West that amount. The decision also concludes, however, that AT&T is not obliged to pay Pac-West either interest or the late payment charges specified in the latter's tariff. This proceeding is closed.

26 (Rev.) R05-10-030 - Order Instituting Rulemaking concerning relationship between California energy utilities and their holding companies and non regulated affiliates.
[5491]

This order amends the October 2005 Order Instituting Rulemaking, both as to scope and schedule, and requests public comment on the need for future revisions to the Commission's (1) Affiliate Transaction Rules and (2) General Order 77-L (which governs the reporting of compensation paid to executive officers and employees of regulated utilities). The OIR continues to apply only to the previously designated Respondents, California's major energy utilities and their holding companies: Southern California Edison Company/Edison International, Pacific Gas and Electric Company/PG&E Corporation, and Southern California Gas Company and San Diego Gas & Electric Company, both owned by Sempra Energy.

R05-02-023 - Order Instituting Rulemaking to revise Commission General Order Number 95 pursuant to D05-10-030.

The Commission on February 24, 2005 issued this Order Instituting Rulemaking 05-02-023 to consider uniform rules for attaching wireless antennas to jointly used utility poles and towers. Following seven days of workshops in San Francisco and Los Angeles, the parties jointly presented a workshop report containing three alternative proposals for a new Rule 94 to General Order 95. The parties reached agreement on most of new Rule 94 but differed on provisions dealing with identification signs, the vertical clearance between supply conductors and wireless antennas with radio frequency (RF) emissions, and exceptions to the rules for certain low-emission antennas. This decision today adopts in its entirety the Rule 94 sponsored by the Commission's Consumer Protection and Services Division, the International Brotherhood of Electrical Workers Local 1245, the Communication Workers of America – Ninth District, Pacific Gas and Electric Company, and San Diego Gas & Electric Company. The decision rejects the assertions of some parties that elements of the new Rule 94 are preempted by Federal Communications Commission (FCC) rules regulating RF exposure, concluding instead that mere acknowledgement of the FCC's RF rules does not preempt a state agency which enacts construction rules intended to provide a safe working environment for those climbing and working on transmission poles. This proceeding is closed.

[5684]

R04-04-025 - Order Instituting Rulemaking to promote consistency in methodology and input assumptions in Commission applications of short-run and long-run avoided costs, including pricing for qualifying facilities.

Today's decision addresses the "2006 Update" of avoided costs and related issues. For the evaluation of energy efficiency resources, the decision refines the interim avoided costs adopted in D05-04-024 in two ways. First, the decision adopts correction factors for residential and small commercial packaged air conditioning (a/c) unit installations, to account for the undervaluation of avoided costs when hourly avoided costs are averaged for these measures by time-of-use periods. Second, the decision updates the natural gas and generation avoided costs currently contained in the E3 calculator that produces ex ante estimates of energy efficiency portfolio cost-effectiveness based on recent market data and updated gas price forecasts. The Commission rejects, however, proposed modifications to the avoided costs methodology that would incorporate an adder during peak hours, either based on the costs of a combustion turbine or other factors. The decision finds that consideration of such an adder requires the resolution of complex theoretical issues, assumptions and methodological issues that are beyond the scope of this 2006 Update. In addition, today's decision addresses several other issues related to the valuation of energy efficiency resources that were identified for the 2006 Update, including: (1) a common definition for energy efficiency peak kW reductions to use in verifying energy efficiency program and portfolio performance, (2) the source of estimates of peak kW impacts that utilities should use for rebalancing their portfolios and reporting program accomplishments during the 2006-2008 program cycle, (3) the schedule for updating estimates of kW and kWh savings for customized rebate programs as they proceed with implementation, and (4) the calculation platform to be used for the ex ante evaluations and submissions of portfolio plans in preparation for the 2009-2011 program cycle. Today's decision also adopts an action plan for moving forward with the requisite load shape updating that all parties urge the Commission to take in order to improve program evaluation and resource planning efforts in the future. In addition, the decision identifies anomalies with respect to the treatment of costs in the total resource cost test that need to be corrected, and provides direction for this purpose. Finally, the decision establishes a process for continuing to assess and implement quality control improvements to the data assumptions and inputs used to perform cost-effectiveness calculations and for updating the E3 calculator in compliance with today's determinations.

Regular Agenda - Telecommunication Orders**34 A05-10-026 - Foresthill Telephone Company.**

[5755]

This decision authorizes Foresthill Telephone Company (Foresthill) to enter into a loan agreement with The United States of America, acting through the Rural Utilities Service and the Rural Telephone Bank to borrow \$24,901,250 for system upgrades and to replace a higher cost interim loan used to finance the acquisition of Foresthill by its current owners. This decision also approves, on a prospective basis, the merger of Fortel, Inc. into Foresthill. This proceeding is closed. The Commission will separately open an investigation into whether the Pub. Util. Code or Commission orders were violated when Foresthill apparently attempted to encumber its assets to secure the interim financing of an acquisition debt without express authority of the Commission, and if so, whether penalties should be imposed. (Exam Coughlan)

Pub. Util. Code §1701.1 -- This proceeding is categorized as Ratesetting.

35 R _____ - Order Instituting Rulemaking into implementation of Senate Bill 1276, as it affects California High-Cost Fund B.

[5756]

The goals of this review include, but are not limited to, adjusting universal service rate support payments to reflect updated operating costs, evaluating whether B-Fund support levels can be reduced and made more predictable while still meeting the goals of the program, ensuring it is competitively neutral, reducing rate disparity in residential basic service between urban and rural areas in the state, and finally, making the current administration of the program more efficient.
